Camp Description

The VizKids camp experience is composed of five days of exciting, hands-on activities designed to give students entering grades 6-9 an introduction to the field of visualization sciences. Through participation in each of the instructional classes, students will have a chance to explore multiple aspects of the field. Sample topics to be covered in workshops include beginning animation, lighting, character design and mapping with Google Earth. Camp concludes with an exhibition of projects that students completed throughout the week.

Camp days will be composed of several instructional classes, enriching presentations by industry and professionals and fun social activities. Students will have the opportunity to be immersed in the University experience by residing in campus dormitories and taking meals in campus dining halls. In addition to Instructional staff, students will be supervised by a full-time Camp Director and both male and female camp counselors.

Dates: Sunday July 10th - Friday July 15th, 2011
Cost: $1000
Includes: meals, lodging and instructional materials
